2. on 21 May, 2 Li-2s were parked in front of the former Buecker hangar and another Li-2 with the white stripe underneath and a yellow stripe on the trailing edge of the rudder assembly was observed in front of the hangars. Two men were working on a piston engine without cylinder heads, on two metal blocks between the repair hangars.

25X1

25X1 Comment. The occupation of Rangsdorf airfield has not changed. The present report confirms the previous assumption that a repair shop for piston engines is located there. Apparently, wings are also being repaired in the repair shop.
